

Type_parameter_pfof

```
classDiagram
    class Type_parameter_pfof {
    }
    class modconstant_type_parameter_psod_snap {
        + do_sod
    }
    modconstant_type_parameter_psod_snap --|> Type_parameter_pfof
```

The diagram illustrates a class hierarchy. The base class, 'Type_parameter_pfof', is shown as a white rectangle with a black border, divided into three horizontal sections. The top section contains the class name, while the two lower sections are empty. The derived class, 'modconstant::type_parameter_psod_snap', is shown as a gray rectangle with a black border, also divided into three horizontal sections. The top section contains the class name, the middle section contains the attribute '+ do_sod', and the bottom section is empty. A blue arrow with a hollow triangular head points from the top edge of the derived class box to the bottom edge of the base class box, indicating an inheritance relationship.

modconstant::type_parameter
_psod_snap

+ do_sod
